Software Engineer with 6+ years of experience in frontend development and web application development using React, Next.js, and TypeScript. Passionate about building performant, accessible user experiences through API integration, performance optimization, accessibility, and modern frontend architecture.

## PROFESSIONAL EXPERIENCE

### Sony Interactive Entertainment

Jan 2026 - Jul 2026

*Software Developer Engineer in Test (Contract)* · Remote, CA

- Improved accessibility across 12+ PlayStation user experiences during a major platform migration.
- Identified 8 customer-facing issues, including 3 high-priority accessibility defects with implications under the European Accessibility Act.
- Designed Python/Selenium automation integrated into Jenkins CI/CD pipelines to improve regression coverage and release confidence.
- Developed an AI-assisted proof of concept for accessibility validation workflows.
- Collaborated with software engineers and product managers on platform modernization.

### LOCH Technologies

Apr 2023 - Aug 2024

*Senior Frontend Developer* · Emeryville, CA

- Built a GPS Canary dashboard with an interactive Mapbox visualization for real-time asset tracking.
- Designed an SDR waterfall visualization using Canvas.js after replacing a D3 implementation that caused browser memory issues.
- Developed an automated Daily Reports dashboard with PDF generation.
- Built Wi-Fi and Cellular dashboards for large-scale network monitoring.
- Collaborated cross-functionally with backend engineers to design database schemas and data structures.
- Integrated frontend applications with REST APIs and WebSockets to support real-time data and interactive user experiences.
- Improved application performance, reliability, and user experience through performance optimization, testing, debugging, and code reviews.

### Upstart

Jul 2021 - Apr 2023

*Full Stack Software Engineer (Growth)* · San Mateo, CA

- Developed 6 landing pages in React.js and Next.js. Improved Lighthouse performance from ~30→90 (mobile) and ~60→96 (desktop).
- Implemented A/B experiments, SEO, accessibility (WCAG), web performance optimization, and structured data to improve user experience and search visibility.
- Collaborated with cross-functional teams to implement i18next for multi-language support and QA.
- Wrote and maintained frontend tests using Jest and React Testing Library, with additional testing in RSpec, Cucumber, Storybook, and Chromatic. Performed QA and cross-browser testing.
- Gathered analytical data via Looker, SQL, Eventbus, Datadog, and Sumologic.

## TECHNICAL SKILLS

### Frontend Engineering

React · Next.js · TypeScript ·  
JavaScript · HTML · CSS · SCSS ·  
Tailwind CSS · Responsive Design

### Data Visualization

D3 · Canvas.js · eCharts · Mapbox GL  
· Leaflet

### Performance & Accessibility

Performance Optimization · WCAG ·  
Storybook · Chromatic

### Backend & APIs

REST APIs · WebSockets · Node ·  
Express · Python · Flask · PostgreSQL

### Testing & Automation

Jest · React Testing Library · Pytest ·  
Selenium · Cucumber · Jenkins ·  
CI/CD

### AI Workflow

Claude · Cursor · GitHub Copilot ·  
Codex

## INTERESTS

Custom Doll Creation · Music ·  
Creative Coding · Content Creation

## EDUCATION

2020 -

### Techtonica

2021

*Full Stack Software  
Engineering Apprenticeship*

2014 -

### Berkeley City College

2018

*Associate of Arts (A.A.) in  
Mobile and Web Design*

2008 -

### State Institute of Film and Television

2010

*Bachelor of Arts (B.A.) in  
Interactive Multimedia*
